PROJECTS

Smart E-Commerce Platform -Tech: MERN stack, JWT, REST-APIs

[Link to Demo](#)

- Developed a scalable full-stack e-commerce platform using the MERN stack with user authentication, product catalog, and order management, following MVC architecture and RESTful API design.
- Built dynamic cart and checkout workflows with real-time UI updates, server-side validation, and persistent data storage in MongoDB to provide a seamless shopping experience.
- Integrated advanced price tracking, alert notifications, and price history visualization to enhance user decision-making, improve engagement, and differentiate the platform from standard e-commerce applications.

Payment System Prototype -Tech: React.js, Node.js, REST APIs, CSS

[Link to Demo](#)

- Built a frontend payment prototype inspired by fintech apps like PhonePe, modeling real-world digital wallet workflows.
- Designed a structured, secure payment flow simulation with backend APIs for transaction initiation, validation, and status updates.
- Implemented responsive UI and reusable components to support different payment scenarios (wallet transfers, bill payments) using React and React Router.

Social Media Web App -Tech: MERN stack,JWT, React Router

[Link to Demo](#)

- Developed a full-stack React-based social media web application.
- Implemented JWT authentication using secure Axios interceptors.
- Integrated APIs and Single Page Application routing using React Router.
- Designed modular frontend architecture for scalability and maintainability.

WORK EXPERIENCE

AWS Cloud Intern

- Worked with core AWS cloud services and deployment workflows.
- Learned IAM, EC2, S3, VPC, and monitoring basics.
- Assisted in cloud infrastructure setup and documentation.

SKILLS

Technical Skills:	C++, JavaScript, Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks.
Frontend:	HTML, CSS, React.js, Redux Toolkit, Bootstrap, Responsive Web Design.
Backend:	Node.js, Express.js, REST APIs, JWT Authentication, MVC Architecture, OAuth, WebRTC, Socket.io.
Database & Tools:	MongoDB, MySQL, Git, GitHub, Postman, VS Code, npm.
Cloud & DevOps:	AWS (EC2, S3, IAM), Docker, Kubernetes, CI/CD, Deployment & Hosting.
